Target

Introduction This gene encodes a member of the integrin alpha chain family of proteins. The encoded preproprotein is proteolytically processed to generate light and heavy chains that associate through disulfide linkages to form a subunit of the alpha-IIb/beta-3 integrin cell adhesion receptor. This receptor plays a crucial role in the blood coagulation system, by mediating platelet aggregation. Mutations in this gene are associated with platelet -type bleeding disorders, which are characterized by a failure of platelet aggregation, including Glanzmann thrombasthenia. (From NCBI)

Product Overview Mouse Anti-Cattle ITGA2B (clone F00055FYA) Antibody (CBMOAB-00055FYA) is a Mouse antibody against the ITGA2B. It can be used for ITGA2B detection in Flow Cytometry.
